Vantage

SEED ROUND · VANCOUVER · NOVEMBER 2026

The amenity above everything.

Vantage designs, factory-builds and installs shared rooftop sauna suites for hotels, rental towers and condo buildings in Vancouver, Victoria and Toronto.

Vantage Sauna Co. · Confidential · Jacob [Last name], Founder & CEO

THE PROBLEM

Canadian towers compete on amenities. The roof sits empty.

New towers are hard to fill

59% of 2025 rental completions in the Greater Toronto and Hamilton Area were still unleased at year end. New Metro Vancouver towers run 11.5–14.8% vacant.

Guests pay for sauna elsewhere

Vancouver has about 20 sauna studios charging C$24–55 a visit. Hotel guests and residents walk out of the building to use them.

The big options are out of reach

A rooftop pool or a spa floor needs plumbing, structure and space the building does not have. The roof stays a mechanical zone.

Today a rooftop sauna means an architect, a structural engineer, a sauna builder, an electrician, a crane company and several permits. **No Canadian firm sells it as a product.**

THE SOLUTION

A rooftop sauna suite as a product: one contract, one price, 12 to 20 weeks.

- **All-electric.** 208 V commercial heaters with a Canadian mark (cETLus, cULus or CSA). No gas, no flue. A transformer kit for 600 V buildings.
- **Factory-built in BC.** Carried up the freight elevator as a flat-pack, or craned as a module. One to six days on site.
- **Engineered for the roof.** Steel base for 4.8 kPa occupied roofs. Seismic anchors, flashed by a roofer, in BC; a ballasted base in Toronto where the site allows.
- **Run by software.** Residents and guests book in the Vantage Access app; the smart lock and session timer do the rest.
- **Serviced for life.** Vantage Care: quarterly inspections, heater stones, bench refinishing, 24-hour support.

12–20 weeks from contract to first session	**1–6** days of on-site installation
4.8 kPa occupied-roof design load	**42%** hardware gross margin at steady state

THE PRODUCT

Three models, one construction system.

Perch

4–6 seats · 1–2 days on site

from C$99,000

- 2.4 × 3.0 m; sauna 2.2 × 2.2 m
- Covered entry porch
- 10.5 kW, 208 V heater; ~2,300 kg
- Elevator flat-pack

Lodge

8–10 seats · 2–3 days on site

from C$179,000

- 3.0 × 4.8 m; sauna 2.8 × 2.8 m
- Vestibule with an indoor shower
- Weatherproof lockers by the entry
- 18 kW, 208 V heater; ~4,500 kg

Summit

12–14 seats · 4–6 days on site

from C$329,000

- 3.6 × 7.2 m; sauna 3.4 × 4.0 m
- Changing room 3.4 × 2.8 m; terrace
- 1,200 L cold plunge; outdoor shower
- 2 × 12 kW, 208 V heaters; ~8,000 kg

EVERY SEAT FACES THE VIEW

Both bench tiers run wall to wall along the back and face a full-length, privacy-tinted glass front. Solid wood side walls carry the door and heater.

BUILT IN ON EVERY SUITE

Canadian-marked heaters, 850 mm clear door, smart lock, session timer, emergency stop. Prices exclude GST/PST/HST; site preparation is quoted separately.

WHY NOW

Sauna demand is real. Buildings have not caught up.

~20

Finnish-style sauna venues in Metro Vancouver, and growing. Drop-ins cost C$24–55; memberships C$130–280 a month.

The Peak, Aug 2026; Scout, Oct 2025

59%

Of 2025 GTHA rental completions still unleased at year end. Two-thirds of new buildings offered incentives.

Urbanation, Jan 2026

78.4%

Vancouver hotel occupancy in 2025 at a C$284 average rate, the highest of any major Canadian market.

CoStar via Horwath HTL, Apr 2026

C$40

A 45-minute sauna session at Fairmont Pacific Rim. Vancouver hotels already sell heat.

11.5–14.8%

Vacancy in large and new Metro Vancouver rental towers. CMHC, Oct 2025.

116

Hotel projects in the Toronto and Vancouver pipeline. Lodging Econometrics, Q3 2026.

MARKET

1,140 suitable buildings in three cities. We plan for 122.

SOURCED UNIVERSE

~4,770

hotels, condos of 100+ units and rental towers

SUITABLE TODAY

~1,140 · C$207M

hardware at C$181,500, plus C$11.5M a year recurring

BASE PLAN, 2031

122

buildings, about 11% of suitable (conservative case: 81)

Segment	Universe	Suitable	Vancouver	Victoria	Toronto
Rental towers, existing and new	1,251	300	70	11	219
Upscale and lifestyle hotels	376	71	21	10	40
Condos and strata, 100+ units (50+ in Victoria, est.)	3,141	772	306	28	438
Total	**~4,770**	**~1,140**	**397**	**49**	**697**

Universe: CoStar via Horwath HTL (hotels), CMHC 2025 (condos, building counts estimated), City of Toronto registry and CMHC (rentals). “Suitable” is our filter: flat roof with 40 m² clear, 8+ storeys or 100+ units, private owner, budget. Details in 06-research/canada-market-research.md.

BUSINESS MODEL

Hardware sale up front, recurring revenue for the life of the building.

1. Purchase

50% at contract, 40% at delivery, 10% at commissioning. Deposits pay for materials. Prices exclude GST/PST/HST.

2. Vantage Flex lease

From C$2,150, C$3,850 or C$6,800 a month over 84 months, Care and Access included. A Canadian finance partner pays Vantage in full at install.

3. Hotel revenue share (up to 3 pilots)

C$0 upfront, 35% of session revenue, C$2,000 a month minimum, five-year term. Vancouver hotels already sell C$40 sessions.

Unit economics per building

Metric	Value
Blended contract, with add-ons	C$181,500
Hardware gross margin	~42%
Recurring revenue per year	C$10,048
Recurring gross margin	63%
Gross profit over 7 years	~C$120,000

Recurring = Vantage Care (C$450–1,150 a month) plus Vantage Access (C$300 a month), after 85% and 90% attach rates. Mix 40% Perch, 45% Lodge, 15% Summit.

GO-TO-MARKET

Start where one person signs. Vancouver and Victoria first, then Toronto.

WHO WE SELL TO, IN ORDER

1. Rental towers and business or serviced apartments: one owner decides
2. Upscale and lifestyle hotels: revenue-share pilots
3. Condos and strata: slower, with a meeting kit for BC and Ontario votes
4. Developers of new rental and hotel projects

HOW WE REACH THEM

- Direct sales to owners and asset managers
- Property and strata management firms
- Architects and developers, briefed in 2027 for 2029–2031 openings
- A demo Lodge in the Fraser Valley and a lighthouse rooftop in Vancouver

LAUNCH PLAN

- 2027: Vancouver and Victoria, 5 paid installs, 3 lighthouse references
- 2028: Toronto sales from Q2; flat-packs ship by truck
- Toronto is about 60% of the suitable pool
- Sales cycle 2–4 months for rentals and hotels, 4–9 for condos

One owner often controls many buildings. The first install in a portfolio is a sale; the rest are a roll-out.

COMPETITION IN CANADA

Everyone sells a sauna. Nobody sells the rooftop.

What the owner needs	Custom build	Sauna makers	Social saunas	Vantage
Rooftop structural and seismic engineering	Yes, bespoke	No	No	Yes, standard kit
Fixed installed price before the site visit	No	Delivered only	No	Yes
Canadian-marked heater and permit package	Per project	Heater only	No	Yes
Booking, smart lock and session timers	No	No	Own venues	Yes
Service plan for the life of the unit	No	Warranty	No	Yes
Amenity owned by the building	Yes	Yes	No	Yes

Custom build: architect plus a local builder such as Vancouver Sauna or SaunaFin. **Sauna makers:** barrels and kits at C$8,000–15,000, and commercial cabins delivered with no install (Fritz Tiny Homes, from about C$78,000). **Social saunas:** Othership, Tevah and HAVN compete for the same guests, and prove the demand.

WHY IT IS HARD TO COPY

The product is the sauna. The moat is everything around it.

1. A seismic-ready rooftop kit

Steel base for 4.8 kPa occupied roofs, carried to beams and columns. In BC it bolts down with engineered, flashed anchors; in Toronto a ballasted base can pass on SC1/SC2 sites.

2. Canadian certification

Heaters marked cETLus, cULus or CSA to CSA C22.2 No. 164; 208 V design; Ontario’s hard-wired 1-hour timer. Then a CSA A277 factory and a module listing.

3. One permit package, three cities

Engineered once for BCBC, the Vancouver By-law and the Ontario code: 850 mm doors, CSA B651 turning space, a noncombustible cladding option, sprinkler-ready, pool permits for the plunge.

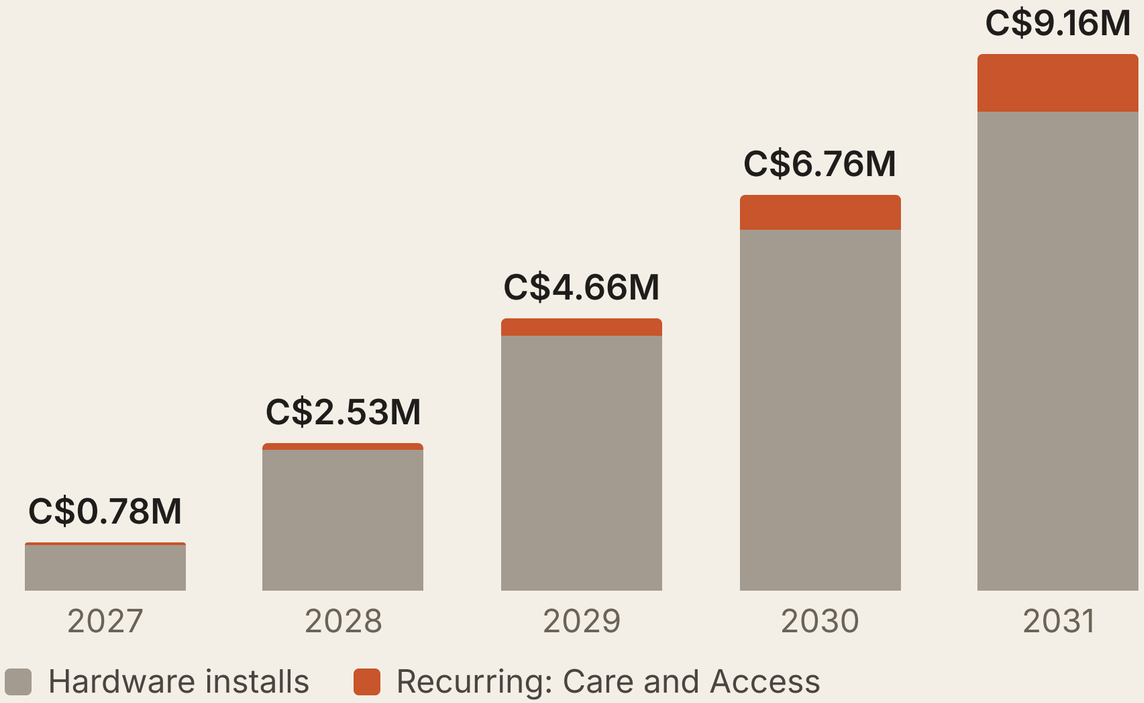

4. The installed base

Every building runs on Vantage Access and Care. Usage data, references and portfolio relationships compound with each roof.

The raise pays for this first: C$260,000 of engineering, certification and testing in 2027.

FINANCIALS · BASE PLAN

C$9.2M revenue by 2031, EBITDA positive from 2029.

Year	Installs	Live	EBITDA	Cash
2027	5	5	−C$0.90M	C$1.19M
2028	14	19	−C$0.32M	C$0.97M
2029	24	43	+C$0.15M	C$1.02M
2030	34	77	+C$0.69M	C$1.69M
2031	45	122	+C$1.33M	C$2.68M

Live = buildings installed at year end. Year-end cash includes the C$2.0M seed (Q1 2027) and the C$350k CSBFP loan (Q2 2027); the pre-seed is spent before 2027. Lowest quarter-end cash C$0.84M in Q2 2029. No Series A in the base plan.

ROADMAP

Six phases, from a mock-up to break-even in 2029.

PHASE 0
Nov 2026–Jan 2027
Set up and validate
- Incorporate in BC
- 30–40 owner meetings
- Seismic and electrical concepts
- 3 letters of intent

PHASE 1
Dec 2026–Mar 2027
Raise the seed
- C$2.0M seed closed
- CSBFP loan approved
- EBC credit for BC angels

PHASE 2
Jan–Jun 2027
Engineer and certify
- Fraser Valley workshop
- Canadian-marked heaters
- Demo Lodge heat-tested
- Permit drawing set

PHASE 3
Jul–Dec 2027
First five installs
- Vancouver and Victoria
- Vantage Care live
- 3 references

PHASE 4
2028
Repeat, open Toronto
- 14 installs, 19 live
- Toronto sales from Q2
- Gross margin 34%+

PHASE 5
2029 onward
Scale, break even
- EBITDA positive
- CSA A277 factory
- 122 live by 2031

Seed milestones: 5 paid installs and 3 lighthouse references by end of 2027; 19 buildings and a Toronto pipeline by end of 2028; hardware margin 40%+ in 2029; zero safety incidents.

THE FIRST 12 MONTHS

From incorporation to the first paid installs.

NOV 2026 – JAN 2027

Set up and validate

- Incorporate in BC; ask for a PST ruling
- Lawyer, SR&ED accountant, BC structural engineer
- 30 meetings with owners and hotels
- Head of engineering hired

Gate: 3 signed letters of intent by end of January

FEB – APR 2027

Fund and open the workshop

- Seed closes by end of March
- CSBFP loan for tools and truck
- Workshop in Langley or Abbotsford
- Sales lead starts in April

Done when: C$2.0M in the bank, loan approved

MAY – JUL 2027

Build the demo Lodge

- Canadian-marked heaters and tinted glass
- Demo Lodge built and heat-tested
- Permit drawing set ready
- Operations manager starts in July

Gate: demo Lodge costs C$130,000 or less

AUG – OCT 2027

First paid installs

- Permits in Vancouver and Victoria
- Two suites installed in Q3
- Vantage Care live
- Three more contracts for Q4

Done when: 2 suites live, zero safety incidents

If a gate fails: fewer than 3 letters of intent means we change the offer before raising; a demo over C$130,000 means we redesign the panels before more orders; fewer than 3 of the 5 pilots willing to buy again by end of 2027 means we pause Toronto.

TEAM

A founder, three first hires, and the advisers we are recruiting.

Jacob [Last name]

FOUNDER & CEO

[Two lines on background: what you have built, sold or run before, and why rooftop saunas.]

Head of Engineering

P.ENG. · JANUARY 2027

Modular or prefab background. Owns the panel system, the seismic kit, Canadian certification and the workshop.

Sales and Partnerships

APRIL 2027

From rental or hotel asset management. Brings owner relationships and runs the pilot program.

Operations and Projects

JULY 2027

Runs permits, installs and Vantage Care across Vancouver and Victoria, then Toronto.

Advisers we are recruiting: a hotel operator, a rental-tower asset manager and a strata manager, plus a BC structural engineer, an electrical engineer and a code consultant on fixed fees. [Add names as they confirm.]

THE ASK

C$2.15M of equity and a C$350k loan.

PRE-SEED · NOW TO MAR 2027

C$150,000

Founder, friends and family, Futurpreneur. Pays for concepts and letters of intent.

SEED · CLOSES BY END OF Q1 2027

C$2,000,000

Range C$1.75–2.25M. BC angels get a 30% tax credit through an EBC.

CSBFP LOAN · Q2 2027

C$350,000

Government-backed. Workshop fit-out, tools, truck, demo unit. Prime + 3%, five years.

Uses, 2027–2028	C$
Team: 4 people in 2027, 6 by end of 2028	1,027,000
Workshop fit-out, tools, truck, demo Lodge and lease	539,000
Engineering, Canadian certification and testing	340,000
Insurance, legal, accounting, software, travel	370,000
Marketing, commission, booking platform, loan payments	450,000
Total	**2,726,000**

WHAT IT BUYS

- A certified product and seismic kit
- A demo Lodge and a lighthouse roof
- 5 installs in 2027, 19 live by end of 2028
- EBITDA positive in 2029, no Series A

Plus about C$150,000 of NRC IRAP support. Instrument and valuation to be agreed: SAFE or priced round.

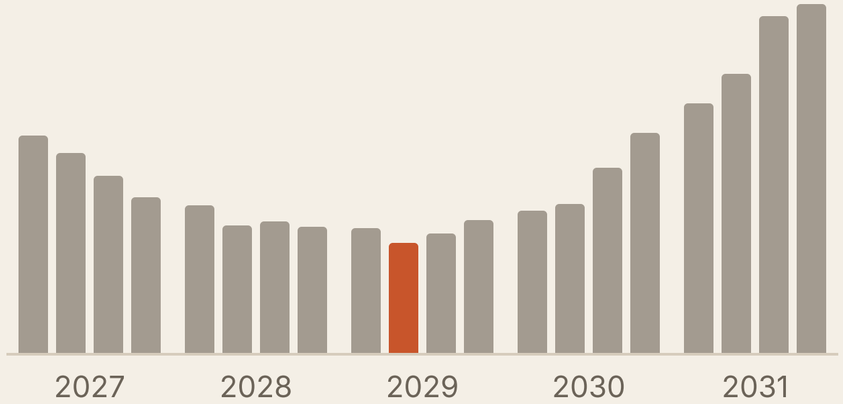

WHAT THE MONEY PAYS FOR

C$1.42M of spending in 2027, and cash that lasts.

Spending in 2027 (C$)	One-time	Running
Engineering, certification and testing	260,000	–
Workshop fit-out, tools and truck	235,000	–
Demo Lodge, built and heat-tested	110,000	–
Booking and smart-lock platform	60,000	–
Team: four people by July	–	392,500
Lease, insurance, legal, accounting	–	186,000
Marketing, travel, software, office, commission, interest	–	172,500
Total	**665,000**	**751,000**

The loan covers C$350,000 of the one-time costs. Customer deposits of 50% pay for materials before each build.

CASH AT EACH QUARTER END

Lowest point **C$0.84M** in Q2 2029, about six months of costs. C$2.68M by the end of 2031.

Vantage

Let’s put a sauna on your roof.
