Vantage

SEED ROUND · NOVEMBER 2026

# The amenity above everything.

Vantage designs, builds and installs rooftop sauna suites for apartment buildings, hotels and offices.

Vantage Sauna Co. · Confidential · Jacob [Last name], Founder & CEO

THE PROBLEM

# Owners have run out of amenities to add.

### Amenities decide leases

Gyms, lounges and coworking floors are table stakes. Owners need something residents, guests and tenants talk about.

### The big options are gone

A rooftop pool costs millions and takes years. A spa floor needs plumbing, mechanical and space the building does not have.

### The roof sits empty

A mechanical zone and nothing else, or a deck used three months a year. The best view in the building, unused.

Today a rooftop sauna means an architect, a structural engineer, a sauna builder, an electrician, a crane company, several permits and about a year. **Nobody sells it as a product.**

THE SOLUTION

# A rooftop sauna suite as a product: one contract, one price, six to ten weeks.

- **All-electric.** UL 875 listed commercial heater. No gas, no flue, no combustion on the roof.
- **Factory-built.** Craned as a module or carried up the freight elevator as a flat-pack. One to six days on site.
- **Zero roof penetrations.** Load-spreading steel base, ballast and parapet tie-back, reviewed by a structural engineer on every site.
- **Run by software.** Residents and guests book in the Vantage Access app; the smart lock, session timer and emergency stop do the rest.
- **Serviced for life.** Vantage Care: quarterly inspections, heater stones, bench refinishing, 24-hour support.

**6–10**
weeks from contract to first session

**0**
roof penetrations

**1–6**
days of on-site installation

**100%**
electric, with 40% hardware margin

THE PRODUCT

# Three models, one construction system.

## Perch

4–6 seats

**from $78,000**

- 2.4 × 3.0 m (8' × 10')
- Sauna + covered entry porch
- 10.5 kW heater, ~2,300 kg
- 1–2 days on site

## Lodge

8–10 seats · our most popular

**from $139,000**

- 3.0 × 4.8 m (10' × 16')
- Sauna, changing vestibule, outdoor shower
- 18 kW heater, ~4,500 kg
- 2–3 days on site

## Summit

12–14 seats

**from $249,000**

- 3.6 × 7.2 m + terrace (12' × 24')
- Sauna, changing room, cold plunge, shower
- 2 × 12 kW heaters, ~8,000 kg
- 4–6 days on site

Every suite: steel base frame carried to the building's structure, non-combustible envelope, double-glazed low-iron glass front, thermo-aspen interior, ETL/UL 875 listed heater, smart lock, session timers, emergency stop. Installed prices are from-prices; site prep is quoted separately.

WHY NOW

# Wellness has become real estate.

## $876B

Global wellness real estate market in 2025, growing 15% a year to $1.8T by 2030. The US is the largest market at $254B.

Global Wellness Institute, May 2026

## > 1 in 2

Renters interested in a hot tub or sauna, yet rooftop space and spas are offered by only just over 10% of apartment properties.

NMHC / Grace Hill 2024

## +5.2%

Rent premium for office buildings with a roof terrace over Class A peers in the same submarket. Prime amenity-rich offices rent 84% higher.

JLL, March 2024; CBRE, 2024

## $6,061

Hotel spa revenue per available room a year; $9,847 at luxury hotels. CBRE, 2024 data.

## $53M

Raised in 2025 by Bathhouse, Othership and Sauna House to open social saunas in our launch cities.

## 7% a year

Growth of the commercial sauna segment, faster than the market as a whole. Grand View Research, 2026.

MARKET

# 89,000 large US buildings. We start with the 37,000 that have the right roof.

| Segment | Sourced universe | Suitable today |
|---|---|---|
| Apartment properties, 100+ units | 56,000 | 20,000 |
| Luxury, upper-upscale and lifestyle hotels | ~5,000 (est.) | 5,000 |
| Office buildings over 100,000 sq ft | 28,000 | 12,000 |
| **Total** | **~89,000** | **37,000** |

Universe: Census Rental Housing Finance Survey (2021, 2024), CoStar/STR via MMCG (2026), EIA CBECS 2018. “Suitable” is our filter for flat roof, building class and institutional ownership.

TAM

$5.2B

37,000 suitable buildings at $140,000, plus $300M a year recurring

SAM

$1.05B

7,500 buildings in seven launch metros (estimate)

SOM BY 2031

$88M

627 buildings installed, 1.7% of the suitable market

BUSINESS MODEL

# Hardware sale up front, recurring revenue for the life of the building.

### 1. Purchase

50% at contract, 40% at delivery, 10% at commissioning. Deposits fund the build, so working capital stays light.

### 2. Vantage Flex lease

From $1,650, $2,950 or $5,200 a month over 84 months, Care and Access included. A finance partner pays Vantage in full at install.

### 3. Hotel revenue share (5 pilots)

$0 upfront, 35% of session revenue, $1,500 a month minimum, five-year term. Hotels price sessions at $35–$60 a guest.

## Unit economics per building

| Metric | Value |
|---|---|
| Blended hardware contract | $140,000 |
| Hardware gross margin | 40% |
| Recurring revenue per year | $8,000 |
| Recurring gross margin | 63% |
| Gross profit over 7 years | ~$92,000 |

Recurring = Vantage Care ($350–$900 a month) plus Vantage Access ($249 a month), after 85% and 90% attach rates.

GO-TO-MARKET

# Sell to the owner, win the portfolio.

### WHO WE SELL TO

1. Class A and B+ multifamily owners and asset managers
2. Lifestyle and upscale hotels
3. Class A office landlords
4. Then senior living, student housing, co-living and private clubs

### HOW WE REACH THEM

- Direct enterprise sales to owners and asset managers
- Property-management companies as channel partners
- Architects and developers on new builds
- Hotel brand wellness and F&B teams

### LAUNCH PLAN

- A demo rooftop in New York City: our showroom and test bed
- Three lighthouse pilot buildings installed at cost in 2027
- Portfolio roll-outs: 1.4 buildings per customer in 2027, 2.5 by 2031
- 3–6 month sales cycle; Chicago, Boston and Toronto in 2028

One owner typically controls many roofs. The first install in a portfolio is a sale; the rest are a roll-out.

COMPETITION

# Everyone sells a sauna. Nobody sells the rooftop.

| What the owner needs | Custom build | Prefab sauna brands | Wellness clubs | Vantage |
|---|---|---|---|---|
| Rooftop structural and crane engineering | Yes, bespoke | No | No | Yes, standard kit |
| Fixed installed price before the site visit | No | Unit only | No | Yes |
| Commercial heater, code and permit package | Per project | Rarely | No | Yes |
| Booking, access control and session timers | No | No | Own venues | Yes |
| Service plan for the life of the unit | No | Warranty | No | Yes |
| Amenity owned by the building | Yes | Yes | No | Yes |

Custom build: architect plus spa or pool contractor. Prefab sauna brands: premium outdoor cabin makers such as Harvia, Thermory and Iglucraft, built for backyards. Wellness clubs: Othership, Bathhouse and similar venues compete for the same wellness demand, but they prove it exists.

WHY IT IS HARD TO COPY

# The product is the sauna. The moat is everything around it.

### 1. Rooftop engineering kit

Steel base frame, ballast trays and parapet tie-backs, pre-engineered for occupiable roofs rated 100 psf, carrying the load to beams and columns. Stamped per site in days, not months.

### 2. Code and permit package

ETL/UL 875 listing of the whole module (heater plus prefabricated room, as Edition 10 allows), NEC 422/424 electrical design, non-combustible envelope and permit templates per metro.

### 3. Two ways onto the roof

Freight-elevator flat-pack by default (no crane permits in dense cities) or a craned module, from the same panel system. Backyard sauna makers need a driveway.

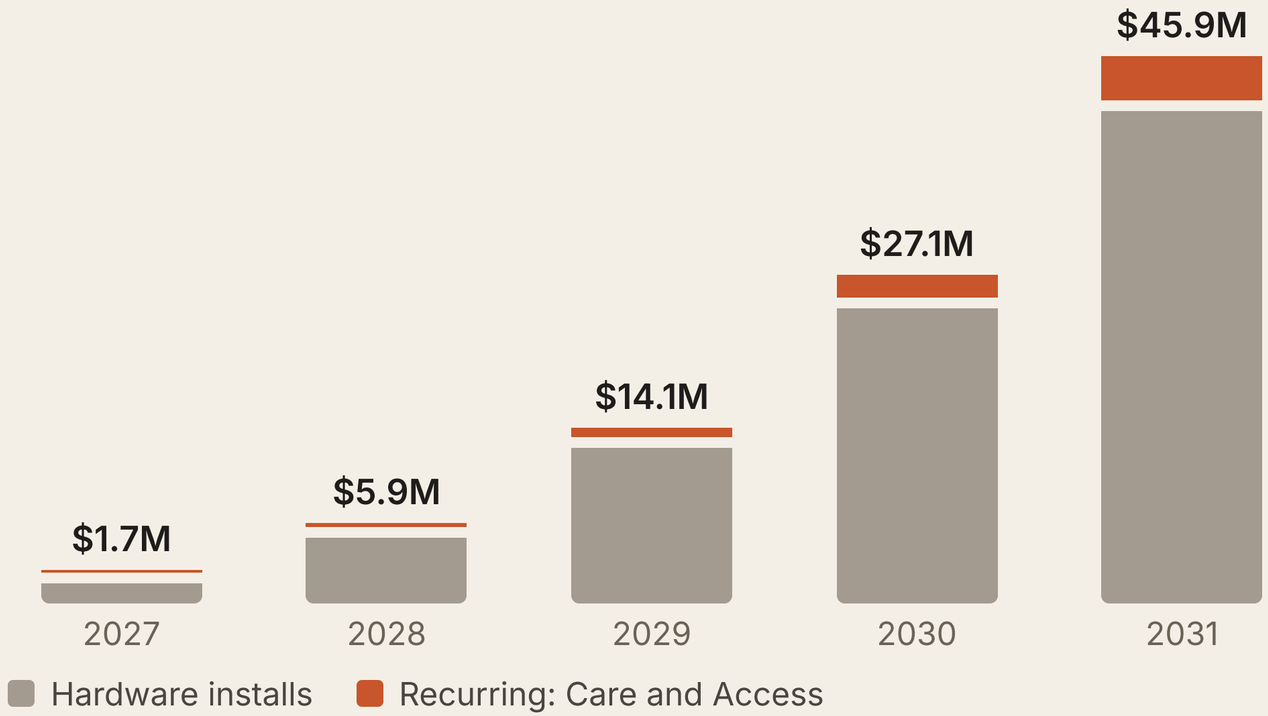

### 4. The installed base

Every building runs on Vantage Access and Care. Usage data, references and portfolio relationships compound with each roof.

Certification, the structural kit and the code package are the first things this seed round pays for.

FINANCIALS

# $46M revenue by 2031, EBITDA positive from 2029.

| Year | Installs | EBITDA | Cash, year end |
|---|---|---|---|
| 2027 | 12 | −$1.3M | $2.3M |
| 2028 | 40 | −$0.7M | $12.1M |
| 2029 | 95 | +$0.3M | $13.2M |
| 2030 | 180 | +$2.3M | $16.7M |
| 2031 | 300 | +$5.7M | $19.8M |

Cash includes the $3.5M seed (Q1 2027) and a $10M Series A (Q4 2028). Peak funding need before the Series A: $2.1M in Q3 2028. Full model available on request.

ROADMAP

# From certified prototype to 300 roofs a year.

**H1 2027**

### Certify and show

- Seed closes Q1
- Three prototypes
- UL/ETL listing
- Demo rooftop in NYC

**H2 2027**

### Pilot and sell

- Three pilot buildings
- 12 installs in year
- Flex finance partner signed
- Care and Access live

**2028**

### Three new metros

- 40 installs
- Chicago, Boston, Toronto
- Series A (about $10M)
- First portfolio roll-outs

**2029**

### Profitable

- 95 installs
- EBITDA positive
- Denver, Seattle, Minneapolis
- Second assembly line

**2030–2031**

### Scale

- 180 then 300 installs a year
- 627 buildings on recurring
- $46M revenue in 2031
- National coverage

Series A gate: 40 installed buildings, three metros live, UL/ETL listing complete, recurring attach above 85%, zero safety incidents.

TEAM

# A founder, three first hires, and the advisors we are recruiting.

## Jacob [Last name]

**FOUNDER & CEO**

[Two lines on background: what you have built, sold or run before, and why rooftop saunas.]

## Head of Engineering

**HIRING Q1 2027**

Modular or prefab construction background. Owns the panel system, the rooftop kit and the UL/ETL listing.

## Head of Sales

**HIRING Q1 2027**

From multifamily asset management. Brings the owner relationships and runs the pilot programme.

## Master Sauna Builder

**HIRING Q2 2027**

Finnish-trained. Owns interior design, bench ergonomics, ventilation and the factory heat test.

**Advisors we are recruiting:** a structural engineer of record, a multifamily owner-operator, a hotel wellness director and a fire-code consultant. [Add names as they confirm.]

THE ASK

# $3.5M seed to certify the product, open the facility and reach 40 roofs.

## Use of funds

| Item | USD |
|---|---|
| Product engineering and certification (UL/ETL, structural kit, code package, three prototypes) | 700,000 |
| Assembly facility, tooling and first inventory | 650,000 |
| Sales and marketing | 650,000 |
| Team: operations and install crew ramp | 600,000 |
| Demo rooftop and three pilot installs at cost | 500,000 |
| Working capital and reserve | 400,000 |
| **Total** | **3,500,000** |

## What it buys

- A UL/ETL listed product with an engineer-stamped rooftop kit
- A demo rooftop in New York City
- Three pilot buildings and 12 installs in 2027
- 40 installed buildings and three metros by end of 2028
- Runway through Q1 2029, with a Series A targeted for H2 2028

Instrument and valuation to be agreed. SAFE or priced round.
